|                 |             |
|-----------------|-------------|
| ■ Black         | NCS S8000-N |
| ■ Graphite Grey | NCS S6500-N |

## ENVIRONMENT

All steels in production are RoHS Directive No. 2011/65/EC and REACH Directive No. 2002/95/EC, and aluminum frames are made of up to 100% recycled aluminum. We use environmental chrome coatings complying with the standards for lacquer coating (DS/EN ISO 1456) and thereby eliminating any risk of nickel allergy.

For all wooden shells and seat pieces in the chair production only FSC-certified wood is used, which i.a. provides a guarantee that no more trees will be felled than the forest can reproduce. The plastic materials used are produced in accordance with the limits of PAK (polycyclic aromatic hydrocarbons) - a selection is produced wholly or partly from recycled PP.

We also offer several sustainable types of fabric, which are made of up to 100% recycled polyester that is produced from plastic granules from plastic bottles.

In addition, we guarantee a long life for each individual product. Once the used furniture has served its function, it can be returned to Savir Design for recycling. In this way, we save on the earth's resources and ensure that our products remain part of the circular economy.

## WARRANTY

Savir Design provides a 2-year warranty on Concept flip tables.

The warranty covers breakage of frames and damage caused by defects craftsmanship in normal use. Wear or damage to wheels, surfaces and the like is not covered by this warranty.

## TEST

(The complete test can be downloaded on [www.savirdesign.dk](http://www.savirdesign.dk))

Concept has been tested for durability at the Danish Technological Institute.

**Test Report**

Material: **Modell Concept table**

| type  | size            | color | year |
|-------|-----------------|-------|------|
| table | 105 cm x 145 cm | black | 2013 |
| table | 105 cm x 145 cm | black | 2013 |
| table | 105 cm x 145 cm | black | 2013 |

Sample: The test material was sampled by the client and received at the Danish Technological Institute 28-02-2013.

Sample: The test material was sampled by the client and received at the Danish Technological Institute 28-02-2013.

Test Goal: General use. General health care, ordinary use, public hall, home, meeting room.

Period: The testing was carried out from 21-02-2013 to 28-02-2013.

Result: Model Concept table fulfills the requirements in EN 13732-2008

Indicated results appear below Appendix 1.

Storage: The test material will be destroyed after 1 year unless otherwise agreed.

Notes: In the test protocol mentioned in the attached document, which, according to the guidelines laid down in EN 13732-2, the Danish Technological Institute will be responsible for the test results. The test material will be returned to the client after the test results have been received.
